RAHK IT CONSULTING VULNERABILITY ASSESSMENT

RAHK IT
CONSULTING

AGENDA

- 1. UNCOVER UNKNOWN VULNERABILITIES**
- 2. SCAN AND INITIATE CORRECTIVE MEASURES**
- 3. IMPROVE SECURITY OUTCOMES**
- 4. NETWORK DISCOVERY AND SCANNING**
- 5. MAINTENANCE & REPORTING**

UNCOVER UNKNOWN VULNERABILITIES

Assess security risks related to endpoint health, user accounts, dark web exposure and more. Findings are compiled and shared in detailed reports that inform next steps.

- Review Firewall & Switches
- Review Endpoints (Laptops, Workstations, Tablets, etc.)
- Review Access Points
- Review Printers
- Review Mail Filtering Application (If Applicable)
- Review Group Policy, Passwords, Orphaned Users, Generic Users
- Review Data locations, Cloud, on premise and what's priority and where it's backed up
- Run Dark web results on exposure
- Contact Internet Provider to see what options are available that may be included but not utilized
- Full Malware scan on both Server and all endpoints

PLAN AND INITIATE CORRECTIVE MEASURES

RAHK IT
CONSULTING

Focus response based-on severity of risk to critical business assets and impact to your clients' operations. Map out long-term requirements.

- Determine what is a threat
- How you share files with external companies or vendors
- How users are entering the system, review Remote login process, MFA

IMPROVE SECURITY OUTCOMES

RAHK IT
CONSULTING

Advance your clients' holistic understanding of cyber threats in their environments and accelerate actions and policies for strengthening their defensive postures.

- Review Group Policies, Firewall policies and work with client to develop policies
- 1 hour training session for company on Cyber Security & protecting the company and the user
- Develop Maintenance plan

NETWORK DISCOVERY AND SCANNING

Uncovers all network assets, even those that are concealed or challenging to locate, and scans for any vulnerabilities that exist to enhance visibility, improve protection, and streamline compliance.

- Scan Network with IP Scanner - <https://www.advanced-ip-scanner.com/>
- Deployment of Intune (Depending on numbers and licensing) Asset Control, Imaging, Patching, Application deployment)
- Review results and align to internal asset list or develop asset list if required

MAINTENANCE & REPORTING

RAHK IT
CONSULTING

Maintenance

- 8 - 16 Hours a Month
(Depending on size of company)

Reporting

- Provide detailed reporting on current state of system and if any change have been completed.
